

460VH

Manual standalone skinner

Designed for intensive industrial use, the model 460VH is conceived to process fish continuously at high speed with the best possible yield. The hygienic concept, the reduced maintenance costs and the optimized ergonomics make the 460VH an outstanding piece of equipment.

When reliability becomes important

Cretel designs and manufactures high quality machines and equipment with focus on hygiene, durability and efficiency, by delivering goods with the best price quality ratio.

Cretel owes its privileged market position to its ability to develop a standard range of products and tailor-made solutions.

Maximum Yield

With the minimum gap between the blade and the toothed roller, the maximum yield is achieved without the loss of valuable flesh.

Applications

This manual skinner skins all flat and round fish species, either whole or filleted, such as plaice, whiting, squid, tilapia, salmon, cod, catfish and many more.
